TECHNICAL SPECIFICATIONS SUPERSEALER SB30:

Bag size range:	All bag sizes.
Bag material range:	Heat sealable materials up to 40 mils.
Speed:	Up to 100 fpm or 30 mpm
Seal width:	7/16" or 11mm
Machine handing:	Right to left or left to right.
Electric:	110 VAC, 1 Ph, 60 Hz, 15 Amp or 220 VAC, 1 Ph, 50 Hz, 8 Amp. CE marked.
Pneumatic:	Required for optional jet flow trim remover

FEATURES

BENEFITS

Stainless steel finish:	Clean and durable, preferred in food and other industries.
Heavy duty band sealing technology:	Unique visually automatic band tensioning system.
Variable speed:	Output can be increased or decreased with a turn of a screw.
Motorized pedestal with mobile base:	With a touch of a button sealer head is raised and lowered for different bag sizes. Base is on casters for mobility.
Easy lift front cover.	On-top access to all components means faster maintenance.
No tool band change over:	Easy to maintain.
Variable speed:	Ease of matching conveyor speeds and flexibility.
Closed loop PID temperature control:	Accurate and consistent sealing temperature.

SUPERSEALER SB30 OPTIONS:

Bag top trimmer:	Two styles: Rotary blade or stationary blade, meeting all application requirements.
Trim removers:	3" (76mm) or 5" (127mm) Venturi sucks trim into mesh bag.
Automatic infeed:	T-PAK infeed into Supersealer for high speed conveyor systems.
Bag coders and printers:	Emboss coder or ink roll coder, up to two lines. All other coders in the market can be integrated with the Supersealer.
Conveyors:	Conveyors to meet all application requirements.
Bag fillers and bag loaders:	OKI works with their partners who manufacture scales, augers and robotics, and automatic bag loaders to create a seamless packing line.
Washdown sealer and corrosive Washdown:	Upgrades for all kinds of environments and applications.
Deduster for difficult dusty environments:	Removes dust that creates barriers for sealing from seal area so that bag can be sealed.
